

# GO FIGURE.

With Haas Trunnion VMCs, you can easily position parts for 5-sided work or full 5-axis machining. Smart.

You could do this: Set up operation 1. Then set up operation 2. Then set up operation 3. And then set up operation 4.

Or you could do one setup and run the job complete.

These times call for a cool head and smart business decisions. Manufacturing businesses need to be efficient and resourceful to survive and prosper. One way to be better than your competitors is by being very efficient. Reduce setups, handling and cycle times, and you can cut prices while increasing profits. Contact us, we can help.
